## SHADAC Data Resources

---

- State Survey Assistance
- State Survey Resource Center
- CPS/ACS Data Center

## Survey Assistance

- State survey design and implementation
- Clarify variance between state estimates from different surveys
- Best practices – health insurance, income, race/ethnicity questions
- Assistance to states using SHADAC's Coordinated State Coverage Survey (CSCS), a survey tool for estimating insurance coverage rates in states - <http://www.shadac.org/content/coordinated-state-coverage-survey-cscs>
- Online library of state survey tools <http://www.shadac.org/content/state-survey-research-activity>

## MaxEnroll States w/State Health Surveys

	Household Survey Years
<b>Alabama</b>	2003
<b>Illinois</b>	2001
<b>Louisiana</b>	2003, 2005, 2007
<b>Massachusetts</b>	2000, 2002, 2004, 2006, 2007, 2008
<b>New York</b>	2003, 2004, 2005, 2006, 2007
<b>Utah</b>	2000, 2001, 2003, 2004, 2005, 2007
<b>Virginia</b>	2001, 2004
<b>Wisconsin</b>	2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008

www.shadac.org

## Strengths: State Household Surveys

---

- Typically more sample than national data
- Flexibility in adding policy relevant questions
- Ability to over-sample and drill down to subpopulations
  - Children, geographic units, race/ethnicity
- Analysts have data in hand
  - Ability to do analysis in-house
    - Quick turn-around
    - Policy development: Simulation of policy options
    - Program design and development, marketing and outreach

## Concerns: State Household Surveys

---

- Lack of comparability across states
- Variability in timing of surveys
- Most are telephone surveys – coverage issues due to large cell-phone coverage
- Inconsistency in data documentation
- Cost concerns limits number of variables
- Discrepancies with other data sources (survey and administrative data)

## Data Center

---

- Online table and chart generator
  - Designed to help health policy analysts build policy-relevant tables of health insurance coverage estimates.
  - Easy to access.
  - Easy to use.
- Estimates available from three sources
  - CPS, as published by the Census Bureau.
  - CPS, enhanced by SHADAC to account for historical changes in methodology.
  - ACS, as published by the Census Bureau (coming soon).
- Trended data
  - CPS estimates from survey years 1988 to the present.
- Easy to export

## Data Center – Available Estimates

---

- Health insurance coverage
  - Uninsured, Insured (private, government, and military)
  - Counts, percents, standard error
- Table options
  - Race/ethnicity
  - Age
  - Poverty
  - Household income
  - Sex
  - Marital status (individual and family)
  - Children in household
  - Work status (individual and family)
  - Education (individual and family)
  - Health status (CPS only)
  - Citizenship (ACS only)
