

The Oregon Health Insurance Survey (OHIS) is an important source of information about health care coverage in the state. The survey provides detailed information about the impacts of health system reform efforts on health care coverage, access to care, and utilization. Data from the 2015 survey provides an early look at how changes due to the Affordable Care Act are impacting coverage. This fact sheet is part of a series exploring health insurance coverage using data from the 2015 survey, and presents information about trends in health insurance coverage for Oregonians.

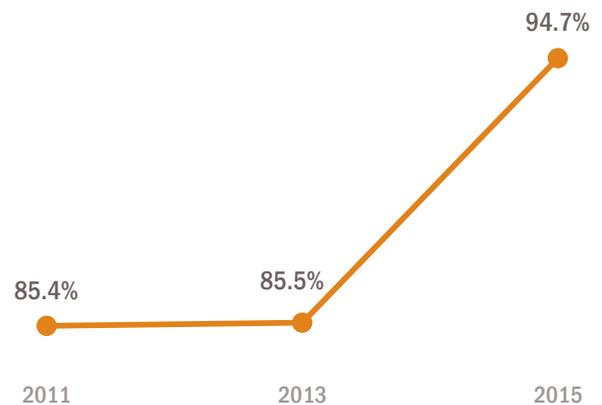

OREGON'S INSURANCE COVERAGE RATE

Almost 95% of Oregonians we surveyed said they had health insurance coverage at the time of the survey. This represents approximately 3.64 million¹ people with coverage, a large increase from 2011 and 2013 estimates (85.4% and 85.5%, respectively). The uninsurance rate in 2015 was 5.3%.

The increase in insurance coverage is an expected outcome of the Affordable Care Act changes. In 2014, Oregon expanded eligibility for the Oregon Health Plan, the state's Medicaid program to provide coverage for low-income individuals and families. The insurance exchange was also implemented, increasing access to health care coverage for individuals without other sources of coverage.

Nearly 95% of Oregonians were insured in 2015.

Point in time insurance rates

INSURANCE COVERAGE BY AGE GROUP

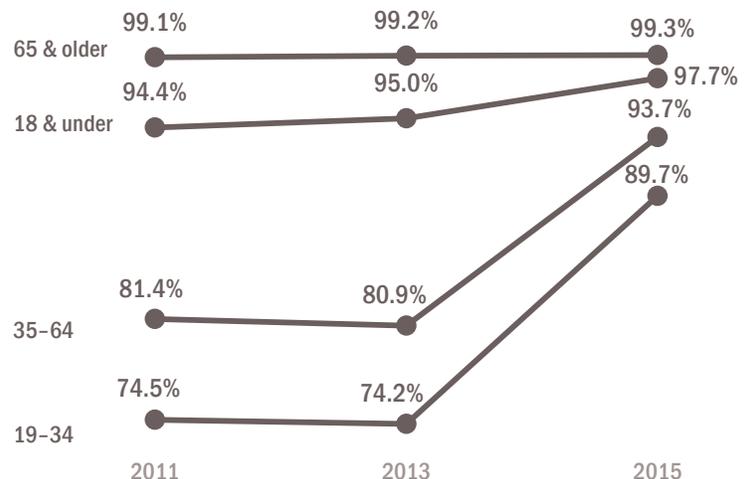

The overall insurance coverage increase in 2015 is driven by many more adults between ages 19 and 64 gaining health insurance coverage.

Rates of coverage for adults 65 and older remained flat, as Medicare provides nearly universal coverage for older adults.

Major expansions to Healthy Kids, Oregon's Medicaid program for children, happened in 2009, so smaller gains were seen for Oregon teens and children in 2015.

Nearly 90% of young adults had insurance coverage in 2015.

TYPES OF INSURANCE COVERAGE

The rate of uninsured Oregonians fell in 2015 while public insurance coverage sharply increased. An uninsurance rate of 5.3% represents just over 203,000² Oregonians without insurance coverage.

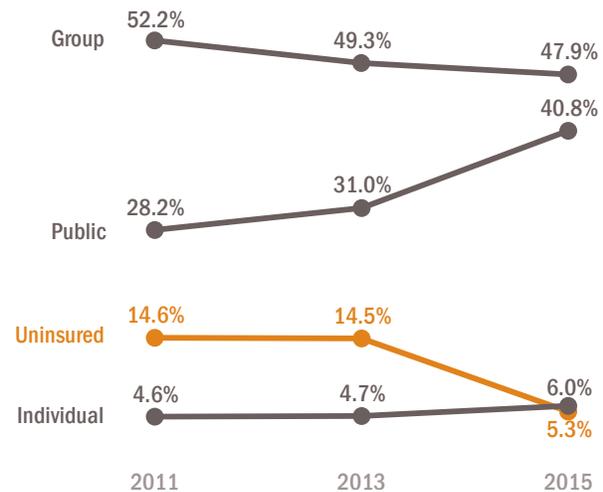

Public coverage includes Oregonians with either Medicare or Medicaid coverage. Medicaid expansion was the key driver of changes to health insurance coverage in the state in 2015. Also, the health insurance exchange was implemented in 2014, which changed the way many Oregonians obtain health insurance and had added benefits of tax credits and subsidies, making coverage more affordable.

INSURANCE STABILITY & GAPS IN COVERAGE

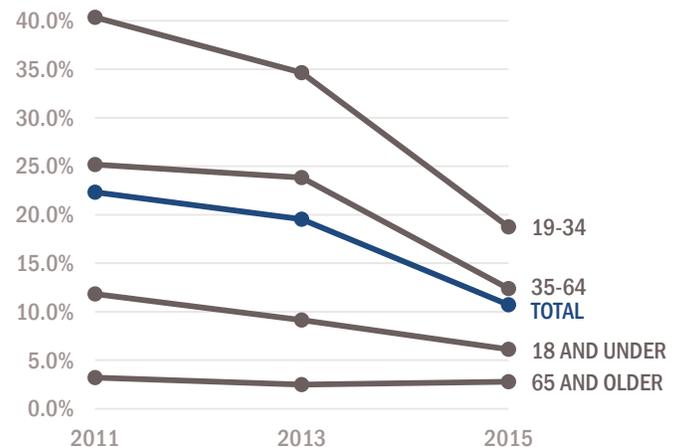

Gaps in insurance coverage can affect access and quality of care. We asked Oregonians if they had health insurance for all of the last 12 months. In 2015, 10.7% reported that they had not had coverage for all 12 months, compared with 19.5% in 2013 and 22.3% in 2011.

In 2011, gaps in coverage were especially common among adults ages 19-64. In 2015, fewer than a quarter of adults ages 19-34 had coverage gaps, compared with 40% in 2011.

The rate of **uninsured** individuals plummeted in 2015.
Insurance coverage rates

From 2011 to 2015, adults ages 19-34 saw the greatest decrease in the rate of coverage gaps.

The Oregon Health Insurance Survey (OHIS) collects information about health insurance coverage, access to care, and utilization in Oregon. The survey is fielded every two years, and data in this fact sheet is from the 2011, 2013, and 2015 surveys. More than 9,000 Oregonians completed the survey between April and September of 2015. The survey sample drew from a list of all residential addresses in Oregon, and respondents were given the opportunity to complete the survey via phone, online, or paper versions. For more information about OHIS methods and results, go to: www.oregon.gov/oha/OHPR/RSCH/Pages/Insurance_Data.aspx

This fact sheet was prepared by Rebekah Gould for the Oregon Health Authority's Office of Health Analytics. The Office of Health Analytics collects and analyzes data to inform policy, monitor progress toward transformation goals, and evaluate programs. The Office supports OHA efforts to further the triple aim goals of better health, better care, and lower costs.
