**ADULT SMOKING RATES IN THE UNITED STATES, 2018**

In 2018, eight states (Arkansas, Indiana, Kentucky, Louisiana, Mississippi, Ohio, Tennessee, and West Virginia) reported that MORE THAN 1 IN 5 ADULTS SMOKED.

The percent of Black adults that reported smoking was significantly higher than the percent of White adults in 7 states and D.C., and was significantly lower in 4 states.*

The percent of Hispanic/Latino adults that reported smoking was significantly higher than the percent of White adults in 7 states, and was significantly lower in 15 states.*

**ADULT VAPING RATES IN THE UNITED STATES, 2017**

In 2017, thirteen states (Arkansas, Arizona, Colorado, Indiana, Kentucky, Missouri, Nevada, Ohio, Oklahoma, Tennessee, Utah, West Virginia, and Wyoming) reported that MORE THAN 1 IN 20 ADULTS VAPED.

Among the states, Oklahoma reported the highest rate of e-cigarette use at 7.1% and D.C. reported the lowest rate of e-cigarette use at 2.5% in 2017.

**Notes:** Data were not available or were suppressed for some states because the number of sample cases was too small, so this number could be higher if data were available in all states. The “Other/Multiple race” category pools many different race/ethnic groups because of the small sample size for each individual category. Adults are defined as 18 years of age and above. All differences are statistically significant at the 95% level.
