\* Indicates the relative standard error for the estimate exceeds 30% and should be treated with extreme caution due to its low precision

Source: 2012 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.

ESI Availability and Enrollment: Firms with fewer than 50 employees, 2012

State	Number of private-sector establishments (Table II.A.1)		Number of private-sector establishments that offer health insurance		Number of private-sector employees (Table II.B.1)		Percent of private-sector employees in establishments that offer health insurance (Table II.B.2)		Percent of private-sector employees eligible for health insurance at establishments that offer health insurance (Table II.B.2.a)		Percent of private-sector employees eligible for health insurance that are enrolled in health insurance at establishments that offer health insurance (Table II.B.2.a.(1))		Percent of private-sector employees that are enrolled in health insurance at establishments that offer health insurance (Table II.B.2.b)

Source: 2012 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.

\* Indicates the relative standard error for the estimate exceeds 30% and should be treated with extreme caution due to its low precision

Source: 2012 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.
