\* Indicates the relative standard error for the estimate exceeds 30% and should be treated with extreme caution due to its low precision

Source: 2006 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.

Premiums and Employee Contributions: Firms with fewer than 50 Employees, 2006

State	Average total single premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.C.1)		Average total employee contribution (in dollars) per enrolled employee for single coverage at private-sector establishments that offer health insurance, by firm size (Table II.C.2)		Percent of private-sector employees enrolled in a health insurance plan that take single coverage, by firm size (Table II.C.4)		Average total family premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.D.1)		Average total employee contribution (in dollars) per enrolled employee for family coverage at private-sector establishments that offer health insurance, by firm size (Table II.D.2)		Percent of private-sector employees enrolled in a health insurance plan that take family coverage, by firm size (Table II.D.4)		Average total employee-plus-one premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.E.1)		Average total employee contribution (in dollars) per enrolled employee for employee-plus-one coverage at private-sector establishments that offer health insurance, by firm size (Table II.E.2)		Percent of private-sector employees enrolled in a health insurance plan that take employee-plus-one coverage, by firm size (Table II.E.4)

Source: 2006 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.

Premiums and Employee Contributions: Firms with 50-99 Employees, 2006

State	Average total single premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.C.1)		Average total employee contribution (in dollars) per enrolled employee for single coverage at private-sector establishments that offer health insurance, by firm size (Table II.C.2)		Percent of private-sector employees enrolled in a health insurance plan that take single coverage, by firm size (Table II.C.4)		Average total family premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.D.1)		Average total employee contribution (in dollars) per enrolled employee for family coverage at private-sector establishments that offer health insurance, by firm size (Table II.D.2)		Percent of private-sector employees enrolled in a health insurance plan that take family coverage, by firm size (Table II.D.4)		Average total employee-plus-one premium (in dollars) per enrolled employee at private-sector establishments that offer health insurance, by firm size (Table II.E.1)		Average total employee contribution (in dollars) per enrolled employee for employee-plus-one coverage at private-sector establishments that offer health insurance, by firm size (Table II.E.2)		Percent of private-sector employees enrolled in a health insurance plan that take employee-plus-one coverage, by firm size (Table II.E.4)

\* Indicates the relative standard error for the estimate exceeds 30% and should be treated with extreme caution due to its low precision

Source: 2006 Medical Expenditure Panel Survey Insurance Component (MEPS-IC) unpublished estimates from AHRQ. Prepared by SHADAC.

Census Note: These data contain unpublished tabulations and may contain high sampling error as reflected in the relative standard error (or cv, as appropriate). High sampling error arises when data are tabulated at levels for which the sample size is inadequate because of cost or other constraints. These data also contain nonsampling errors, such as errors of coverage, measurement, missing data and imputation, specification, and classification, that introduce unknown biases. However, the Census Bureau makes every effort to keep all biases to a minimum. These tabulations have not undergone a thorough review, and therefore, you should exercise caution in their use and interpretation. Unpublished data are intended for your internal use only and may not be published citing the Census Bureau as the data source.
