In 2016, Oklahoma adults with less than a high school education were more than 4 TIMES as likely as those with a Bachelor's degree or higher to skip needed care due to cost.

28.5% of adults with less than a high school diploma
6.6% of adults with a bachelor degree or higher

13.9% of Oklahoma adults had less than a high school education in 2016.

14.1% of U.S. adults had less than a high school education in 2016.
